Software engineer with an Engineering Degree from ISEN, specialized in full-stack development with Java/Spring Boot, React, and Python. I have experience through a work-study program and internships on web and mobile applications, as well as REST APIs. I am able to work independently on development tasks, databases, and Docker/VPS deployment, and I am currently seeking a role as a Java/React Full-Stack Developer, Java Backend Developer, or Python Developer.

PROFESSIONAL EXPERIENCE

Mobile & Web Developer Apprentice, SEZAIA 10/2024 – 09/2025 | Brest

- Development of a complete after-sales service solution (Kotlin Android app + React web interface) for managing customer incidents.
- Design and development of a REST API using Flask (Python) connected to a MySQL database to centralize after-sales service data.
- Implementation of a system using unique QR codes to identify products and track incidents in real time.
- Deployment and configuration of the application infrastructure (API, database and frontend) on an IONOS VPS server.
- Collaboration with business teams to improve incident tracking and customer support management.

Technologies: Python, Kotlin, React, MySQL, Flask, Git, IONOS.

Java Developer Intern, CAASHPAY 06/2024 – 09/2024 | Paris

- Development of a secure REST payment API compliant with the CB2A protocol and the ISO 8583 standard in Java.
- Development of an acquirer bank simulator in Python to test and validate payment flows.
- Implementation of a MongoDB storage system for managing simulated transactions.
- Conducting integration tests and simulating payment terminals using Postman.

Technologies: Java, Python, MongoDB, ISO8583, PCI-DSS, Git.

EDUCATION

School of Engineering for Advanced Technologies and Digital Technology (ISEN Yncréa Ouest), Engineering Degree, specializing in Software Development 09/2023 – 09/2025 | Brest

Lebanese University - Faculty of Technology, Bachelor's Degree in Computer Networks and Telecommunications Engineering 09/2018 – 06/2021 | Saida, Lebanon

PROJECTS

SaaS order management platform – OrderHub, Technologies: React, TypeScript, Spring Boot, PostgreSQL, Docker, Nginx, CI/CD (GitHub Actions), VPS IONOS 04/2026 – Present

- Development of a full-stack application to centralize orders (WhatsApp / Instagram).
- Implementation of a React + Spring Boot architecture with a PostgreSQL database.
- Implementation of authentication (JWT, email, password reset).
- Deployment on a VPS using Docker, Nginx and CI/CD via GitHub Actions.
- Link: <https://orderhubly.com> 🌐

Website – La Beyrouthine Restaurant, Technologies: React, TypeScript, Tailwind CSS, Java, Spring Boot, PostgreSQL, Docker, Git, GitHub. 02/2026 – 03/2026

- Development of a full-stack web application with a dynamic menu and an automated email booking system.
- Design of a React + Spring Boot architecture with a PostgreSQL database.
- Creation of an administrator dashboard to manage bookings and the menu.
- Containerization and deployment on a VPS using Docker.
- Link: <https://la-beyrouthine.fr> 🌐

E-commerce website, Technologies: AngularJS, Bootstrap. 11/2023 – 12/2023

- Development of a user interface and an admin panel.
- Implementation of product and content management features.

Remote Irrigation Management for an ISEN Greenhouse, Technologies: GCE Electronics tools. 01/2024 – 04/2024

- Design and installation of a remotely controlled irrigation system.
- Project management using Agile methodology (sprints, backlog, reviews).
- Integration of sensors to automate watering based on weather conditions.

SKILLS

Programming languages: Java, Kotlin, Python, TypeScript, JavaScript, HTML5, CSS3

Frameworks, APIs & Libraries: Spring Boot, React, Tailwind CSS, Flask, REST API, JWT, AngularJS, Bootstrap

Databases: MySQL, PostgreSQL, MongoDB

Tools & Deployment: Git, GitHub, Postman, Docker, Nginx, GitHub Actions, CI/CD, VPS IONOS

Environments: Android Studio, Visual Studio Code, IntelliJ IDEA

LANGUAGES

French: Fluent | **English:** Fluent, TOEIC (850 / 990) | **Arabic:** Native
